SUPPLEMENT TO
REPORT NO.

DATE OF
INFO. [REDACTED]

1. Moscow Aircraft Test Plant No 115 was located on Leningrad Street in Moscow. (1)
2. The plant was called Zavod No 115 in the PW camp. A new story was constructed on a building in the northeastern plant section. The building was comprised of several machine shops, offices and small workshops.
3. The plant management included air force officers and civilians.
4. It was noted that an aircraft was occasionally towed out of the building and parked in the courtyard. No landing gear was observed, the craft rested on supports. When the power plant was started the noise of a two-cycle engine was heard first, followed by the howling noise of a turbine. The engines ran for a period of five to twenty minutes.
5. The plant was protected by a board fence along Leningrad Street, the other sides were surrounded by a barbed-wire fence. Civilian guards with carbines were observed.

25X1A

Comment: Previous information indicated that construction at the pilot (1) plant was continued during 1948. See Annex 1 for sketch showing location of aircraft test plant.

2 Annexes: 3 sketches on two dittos: Moscow Aircraft Test Plant No 115.
